

Claims

[c1] I claim:

1. An apparatus for isolating a user from an environment, comprising:
a base;
a plurality of sides, in communication with said base;
a top; and
an air filtration system;
wherein said base, said plurality of sides, said top, and said air filtration system communicate with seals and clasps which are non-irritating to the user with multiple chemical sensitivities.

[c2] 2. The apparatus of claim 1, wherein said plurality of sides incorporates a transparent material.
